

BS 25999 Business Continuity Management Awareness In-house Training Course

Overview

Understanding the new Standard for Business Continuity Management and how it could assist you and your organisation

The British Standards Institute (BSI) has published a new Standard (BS 25999) that clearly defines the process, principles and terminology of Business Continuity Management (BCM) and Business Continuity Plan (BCP) Development.

This overview presentation addresses the need for adopting a BCM policy and framework and explains how the BS 25999 could assist organisations to ensure that mission critical activities and key risk scenarios have been included in the Business Continuity Plans, and that businesses respond to adverse situations timely and appropriately.

Managers and professionals will gain an understanding about Business Continuity Management issues affecting organisations today.

BS 25999 is introduced and explained at a high level as the best practice model and standard for Business Continuity Management. Managers and other professionals will gain insight about the components of the BS 25999 standard and specification, implementation aspects, and the relationship with Corporate Governance and risk management.

Objectives

The course is aligned with the Business Continuity Institute's (BCI) ten certification standards and the new BS 25999 Specification for Business Continuity Management.

On completion of this high-level course, delegates will have a comprehensive understanding of Business Continuity Management (BCM) and the processes involved in establishing a BCM programme.
