

COBIT® Version 4.1 Executive Overview Training Course

Overview

This overview presentation addresses the need for an IT control framework and explains how the COBIT® addresses this in relation to other frameworks.

Objectives

At the end of this presentation, executives will have an understanding of:

- How IT management issues are affecting organisations
- The need for a control framework driven by the need for IT Governance
- How COBIT® meets the requirement for an IT Governance Framework
- How COBIT® is used with other standards and best practices
- The elements of the COBIT® Framework
- Approach to COBIT® and IT Governance implementations

Course Content

As per the "Course Objectives", the course addresses:

- How IT management issues are affecting organisations
- The need for a control framework driven by the need for IT Governance
- How COBIT® meets the requirement for an IT Governance Framework
- How COBIT® is used with other standards and best practices
- The elements of the COBIT® Framework
- Approach to COBIT® and IT Governance implementations

What you will learn

In 40 minutes, executives will gain an understanding about IT Governance issues affecting organisations and the need for a proper control framework. The COBIT® IT Governance Framework is introduced and explained at a high level as the best practice model for IT governance. Executives will gain insight about the components of the COBIT® model, implementation aspects, and the relationship with other complimentary IT frameworks such as ITIL® and ISO 17799.
